REFERENCE

Project Description

Vits Systems GmbH is a systems supplier with global operations for equipment in the field of “web material handling”. Its experience is in the development, engineering, production, installation, and after-sales service of high-speed systems and highly qualified products. With its Systems business unit, Vits is the world’s largest supplier of doping systems, including exhaust gas cleaners and automatic resin mixing and dosing systems. With over 800 systems, Vits covers about 80% of the world market.

INP Services

- Mechanical and electrical installation and commissioning support
- Personnel and material supply for the installation
